

PRODUCT OVERVIEW components

- ① Carry handle
- ② Charging port
- ③ Indicator light
- ④ Rotary switch
- ⑤ Light guide
- ⑥ Grid
- ⑦ Shell
- ⑧ Bottom shell
- ⑨ Non-slip mat

SPECIFICATIONS

Model NO.	CN-10
Size	87x87x125mm
Net Weight	
Input	
Power	

USE SUGGESTIONS

- 1, Please turn on the mosquito killer lamp at least 2 hours before sleeping.
- 2, The mosquito killer lamp works better under nobody environment as the body's temperature and smell are more attractive to mosquito to affect the using effect.
- 3, The mosquito killer lamp adopts the physical anti-mosquito, without any drugs and chemical ingredients, so mosquito killer lamp can not kill mosquitoes immediately once it turn on.
- 4, Due to kill mosquito by the physical electric shock, the mosquito wrecks that were killed yesterday can be cleaned directly the next day.
- 5, Please keep it use for more than 48 hours continuously for the first time. The use effect is better in dark environment. Please place it higher than 1 meter on the ground. Turn off other lights to ensure the only source of mosquito control.

CLEANING STEPS

Use a cleaning brush to clean mosquitoes and debris from the electric grid, then dump the trash into the garbage can and remember washing your hands.

PACKING LIST

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection

against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Important: Change or modifications not expressly approved by the manufacturer responsible for compliance could void the user's authority to operate the equipment

This device complies with part 15 of the FCC Rules .

Operation is subject to the following two conditions :

- (1) This device may not cause harmful interference , and
- (2) this device must accept any interference received , including interference that may cause undesired operation
