- ① Pour the pure water into the water tank along the direction of the sign, and do not exceed the maximum water level.
- ② After powering on, press the button  to start with the default function (about 10 seconds, the fog will slowly come out from spray jet).
- ③ Press the button  to switch the lighting colors
- ④ Press the button  to set the timing shutdown, you can choose 30 minutes, 60 minutes, 120 minutes, 180 minutes, the timing indicator of your choice will also light up at the same time, the humidifier shuts down automatically when the timer is reached.
- ⑤ Press the button  to adjust the mist levels, a total of three levels adjustable.

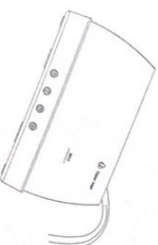

1. Pull up the top cover

2. Add water to tank

3. then drop in water-soluble essential oil (in case of need)

4. Pour the waste water along the sign

Important Hint

- ① Your "flame humidifier" needs to be equipped with an adapter for use and output current needs to reach (DC 5V/2A), if your power adapter does not reach (DC 5V/2A) The flame humidifier may not work properly.
 - ② When the water tank is short of water, the humidifier will make a "beep beep beep" sound and automatically stop working.
 - ③ After lifting the shell, water can be added. Water must be poured along with the water position, then essential oil can be added (it must be a water soluble essential oil), no more than 3 drops.
- Note: Do not use volatile liquids, such as deodorant, perfume, etc., please make sure use water-soluble essential oils.
- ④ When replacing waste water, the top cover needs to be opened and dump the waste water in the direction of the pour.
