Solid-state Battery

Solid-state batteries are a type of lithium-ion battery that utilizes a solid electrolyte in place of the liquid electrolyte and separator found in conventional lithium-ion batteries.

Solid-state batteries offer a number of advantages over conventional lithium-ion batteries, including improved safety, extended calendar life, and ultrahigh energy density.

Solid-state batteries are considered to be the next generation of lithium-ion batteries and have the potential to revolutionize the new energy industry.

BOSEN POWER BANK

Leading Solid-state Battery Technology

This power bank BS-320 is a perfect charging bank for mobile phone and tablet.

Specifications:	
Model	BS-320
Battery Type	Solid-state Battery
Battery Capacity	10000mAh
Limiting Voltage	4.2±0.05V
Specification Size	148×75×15.6mm
Input	Mirco 5V=2A 9V=2.22A 12V=1.5A(Type-c)max
Output	Type-c PD: 5V=3A 9V=2.23A 12V=1.67A max
Rated Energy	6900mAh

Charging

Connect the power bank to a travel charger using a data cable with a Micro USB or Type-C connector to charge the power bank. The charging power will be displayed in real time. The relationship between the charging power and the indicator light is as follows:

0%-100%	LED Indicator
---------	---------------

Discharging

Connect the power bank to your phone using a data cable with a USB-A or Type-C connector to charge your phone. The remaining battery power will be displayed in real time. The relationship between the battery level and the indicator light is as follows:

100%-0%	LED Indicator
---------	---------------

Attention

- Please fully charge the product before using it for the first time.
- For the first use of this product, please check first if there are any obvious unacceptable cracks on the casing, if the interface functions, digital display indicators, and buttons are working properly to ensure you have a good product experience.
- Do not use a Lightning data cable adapter to charge your phone or power bank in fast charging mode to avoid burning the data cable.
- To ensure a longer power bank lifespan, if it is left unused for a long time, please charge the power bank at least once every three months.
